Omar Essam Manaa

He is the leader of our group who finish the plan of our program and distribute the task to each of us. He not only finish his part of code – the main method and class, but also helped us with our work.

Wan Nasrul Irfan Bin W Ismail

He is a very efficient programmer, he developed the most part of the code to help us meet the requirement of the task. After that, he began to work on the extra features and came up with many crazy ideas.

Chen Baogang

He is another great back-end programmer like Nasrul, he developed part of the main program and helped to make the crazy ideas come true. He turned the concept in our brains to reality by working hard.

Wang Jiacheng

He is more like a front-end programmer who helped with debugging and make the program more clear and efficient. He also helped to develop some crazy ideas, then he did the conclusion and wrote the report.

Project Timeline

Task	Week 8	Week 9	Week 10	Week 11	Week 12
Ice-breaking					
Task analysis					
Job distribution					
Main program					
Extra feature					
Debugging					
Report					

Problems & Solutions

In the process of accomplishing the task, we faced many problems, but after all, we managed to solve them one by one.

The first problem we met is during the ice-breaking, because at that time we don't know anything about each other, we don't know what the others are good at and what are their drawback. But, we tried our best to get in contact as soon as possible and discuss about the job distribution, we're glad to see a satisfying result – we all got the job that we're best at.

Then we began to work on the code, the problems we faced at this step is that we couldn't see what we should do to solve the task at first. So, we had a lot of meetings and helped each other to get a better understanding of the task so we can start programming and making great progress.

After that is the extra feature, same as the last step, we couldn't see what we should do at first, so we separated the job and chose the extra features that we think we can work out. In fact we not only followed the crazy ideas on the instruction but also came up with some of our own.

The final part is the report, we had the last meeting to do the conclusion together and decided what we should do about the report. At last, one of us gathered the ideas and finished the report within a short time.

Extra Lessons

During the time we spent together, we developed not only the program to solve the task but also the friendship among four of us. We learned how to work with others and solve the problem with strategy as well. After all, we can all agree that this is a very hard but helpful assignment.
